

Study Programme: Architecture			
Course Unit Title: Architecture Analysis, Functions and Typology 2			
Course Unit Code: A204			
Name of Lecturer(s): Krklješ Milena			
Type and Level of Studies: bachelor			
Course Status (compulsory/elective): compulsory			
Semester (winter/ summer): summer			
Language of instruction: english			
Mode of course unit delivery (face-to-face/distance learning): face-to-face			
Number of ECTS Allocated: 5			
Prerequisites: none			
Course Aims: Extending basic knowledge in the process of architectural analysis, as a precondition for adequate synthesis – project. Mastering the basic functional programmes of architectural and/or urban space for their design. Mastering and training for independent approach to the process of designing more simple spatial-functional frames within certain architectural typologies.			
Learning Outcomes: The student is trained to independently solve more simple functional programmes within architectural design and urban planning, which will serve as a base for extension in the field of design and planning of complex programmes at both spatial levels.			
Syllabus. Functional and compositional analysis, architectural typology. Spatial levels in architecture and urban planning, the details of landscape architecture and its place, role and importance of the built environment. Concept and context of the architecture. Architectural analysis in function of synthesis, an introduction to the design procedure.			
Required Reading: Relevant literature in English, tbd			
Weekly Contact Hours:2	Lectures: 2		Practical work:
Teaching Methods: Lectures, Practice, Graphic Papers, and Consultations.			
Knowledge Assessment (maximum of 100 points):			
Pre-exam obligations	points	Final exam	points
Attendance			
Computer exercises			
Tests (4x)
